INTORQ BFK557

Holding brake with emergency stop function and minimal height

PRECISION. SAFETY. MOTION.

Our brakes - perfect for your safe application

KENDRION Industrial Brakes - this stands for excellent service and smart innovation, which we consistently use for the benefit of our customers:

Strong know-how

Our specialists develop pioneering permanent magnet and spring-applied brakes. On the one hand, they use the bundled know-how in the team; on the other hand, they maintain a dialogue with customers in order to always keep trends and requirements in mind. With INTORQ as a new addition to KENDRION, we have once again consistently expanded our range of spring-applied brakes and clutches for you. So we can find the right solution for every requirement.

Complete product portfolio

Electromagnetic brakes and clutches as well as perfectly matched accessories: With us you will find an exceptionally large selection of quickly available off-the-shelf products that can be put together in a modular system and the best expertise for customer-specific solutions.

Dynamic innovative power

Worldwide, more than 50 specialists in our research and development department work in agile teams to create convincing product solutions for tomorrow.

In-depth market knowledge

We are very familiar with our focus markets - thanks to in-depth experience and research, but also thanks to long-standing customer relationships based on partnership at eye level.

International power

Committed and competent employees, production sites in Germany, United States, India and China as well as a large number of certified sales partners all over the world make us a strong partner for you!

The INTORQ BFK557

On the point

- Fail-safe spring-applied brake
- Flat, space saving design
- Holding brake with emergency stop function
- Optimized for motors in FI operation
- Project solution as an operating brake is possible

Suitable for the use of:

The optimal holding brake

Brakes are used for many applications that need to perform a holding function only. Except for the classic emergency stop situations, dynamic braking rarely occurs.

Kendrion has launched a new brake series, the INTORQ BFK557, which is precisely tailored to these requirements. This series features friction linings designed for this purpose and can be used without any problems in speed-controlled motors (FI operating mode). The BFK557 also features the expected high-level emergency stopping energy of INTORQ brakes. A friction lining which has a low tendency to stick was specially selected.

The new INTORQ BFK557, labeled with CE mark and UL-certified, can be used around the world in all markets. As with the BFK457, BFK458 and BFK470 series, the bolt hole circle, the available hub diameters and the number of mounting bolts are always identical. Thus, interchangeability between each series is guaranteed.

The compactness of the brake and fixed air gap ensure a simple and cost-effective installation process. Furthermore, there are no maintenance expenditures. Kendrion also provides the corresponding rectifiers, to match your requirements, for optimally controlling the brakes. Get in touch with us!

Perfect for use as a holding brake
with minimal height

Technical highlights

- Flat, compact design
- Maintenance-free
- Quick, easy installation
- Options: Friction plate, flange, hand-release, cover ring

Technical details

Design types	Rated torque, minimum torque (H version)
Standard rated voltages	24 V, 103 V, 180 V, 205 V
Protection class	IP00 – IP55
Thermal class	F (155°C)
Ambient temperature	-20 to 50°C
Min. holding torques	2 to 40 Nm
Operating time	100% ED
Nominal angular backlash	1°
Options	Friction plate, flange, hand-release, cover ring
Notice	Please read the general information on data sheets and the corresponding operating instructions. Design subject to change without notice.

Brake size	Rated torque @ 100 [min ⁻¹] M ₂ torque	Minimum torque* M ₄ torque	Rated power [W] (at 20°C)	Emergency-stop speed n _{0max} [min ⁻¹]	Switching energy for single switching W _{max} [J]	Number of emergency stops with maximum energy Z _{ges} [-]
06	5	4	20	6000	3000	100
08	10	8	25	5000	7500	100
10	20	16	27	4000	12000	100
12	40	32	40	3600	24000	100

* For the H version, the minimum torque is specified on the brake's name plate.

You will find the right design for your application in our product finder!

Overview of product variants

BFK557 – —

Design

Version	☐ Minimum torque specification M_4 in Nm (H version), tolerance 0/+80%			
	☐ Rated torque specification M_2 in Nm Based on 100 rpm, tolerance -25%/+40%			
Size	☐ 06	☐ 08	☐ 10	☐ 12
Voltage	☐ 24 V	☐ 103 V	☐ 180 V	☐ 205 V
Rotor	☐ Aluminium	☐ Noise-reduced (rotor with toothed intermediate ring)		☐ Plastic Only sizes 06 and 08

Fastening screws Included in all versions and adjusted in length according to the option (counter friction surface).

Options

Hub	☐	For bore diameter, refer to the dimensions	
Hand-release	☐	Installed	
Counter friction face	☐	Friction plate	☐ Flange
Sealing	☐	Cover ring	

Customized solutions – tailored exactly to your needs

Automation solutions have become an indispensable part of industry and everyday life. In this context, it is often the brakes that ensure safety: They hold loads and brake reliably in an emergency.

Just as automation continues to evolve, brakes must also face higher demands – forward-looking products are in demand. At the same time, quality and safety must be unconditionally guaranteed. This is a challenge that Kendrion Industrial Brakes meets with passion and care.

When it comes to developing customer-specific solutions, we have three aces up our sleeves:

- With our **new agile organization**, we respond much faster to customer requests.
- Our **modularly developed products** enable new configurations without complete redevelopment.
- The **global structure of our organization** bundles competencies and ensures valuable knowledge transfer.

This makes us a competent and reliable partner for our customers - starting with industry-savvy consulting, through product development with practical experience, to uncompromising quality assurance.

We will find the
solution that suits
you best!
